A moderate charge will be made for all cases unless otherwise specified.

Reading Hardware Company.

Special Notice.

CAUTION

For our protection, all Designs on our new goods are patented, or patents are pending.

Reading Hardware Company.

Description of Finishes.

GERMAN BRONZED.

The German Bronzed goods are made of iron. The surfaces are not polished, and are finished in a brown color.

AMERICAN BRONZED.

The American Bronzed goods are made of iron. The surfaces are finely polished, and finished in a dark-brown color, producing a contrast between the bright polished surface and dark background.

PERSIAN BRONZED.

The Persian Bronzed goods are made of iron. The background is finished in dark brown; the raised surfaces are finely polished, and then bronzed and lacquered.

ALBION BRONZED.

The Albion Bronzed goods are made of iron. The surfaces are finely polished, and then finished in imitation of Bronze Metal.

GENEVA BRONZED.

The Geneva Bronzed goods are made of iron. The background is finished in black; the raised surfaces are finely polished, and then finished in imitation of Royal Bronze.

BRONZE METAL.

The Bronze Metal goods are made of genuine bronze; have ornamented surfaces; are highly polished, and finished in their natural color.

ROYAL BRONZE.

The Royal Bronze goods are made of genuine bronze; have ornamented surfaces; the background is finished in a permanent black color; the raised surfaces are highly polished, showing the bright metal.

PLAIN BRONZE.

The Plain Bronze goods are made of genuine bronze; have plain surfaces; are highly polished, and finished in their natural color.

SCREWS.

All screws packed with our Bronzed Iron goods are bronzed to match the goods.

All screws packed with our Bronze Metal, Royal Bronze, and Plain Bronze goods are made of genuine bronze.

ID 89-13413 TCF

Full Packages.

Packages will be charged for at cost, except on the following list of goods, on which there will be no charge for **FULL CASES** or **BARRELS** when ordered in **ORIGINAL PACKAGES**.

READING
APPLE PARER
PATENTED.
MADE ONLY BY THE
READING
HARDWARE CO.
READING PA.
U.S.A.

This celebrated Parer is known to all by its well-deserved reputation.
'78 Apple Parer, with Automatic Push-off, per dozen, \$
One-twelfth Dozen in a Box. One Dozen in a Case. No charge for Case.

Apple Parer, Corer, and Slicer.

CHAMPION AUTOMATIC.

Patented November 14, 1876, April 6, 1880, and January 16, 1883.

This is an automatic machine that pares, cores, and slices, with an automatic core push-off. It leaves the apple in a spiral slice. Put the apple on and turn is all one has to do—six turns only. When the slicing knife is removed, it is an automatic parer only. It is heavy and durable, and all machines are warranted to give satisfaction.

Champion Apple Parer,

One-twelfth Dozen in a Box. One Dozen in a Case. No charge for Case.

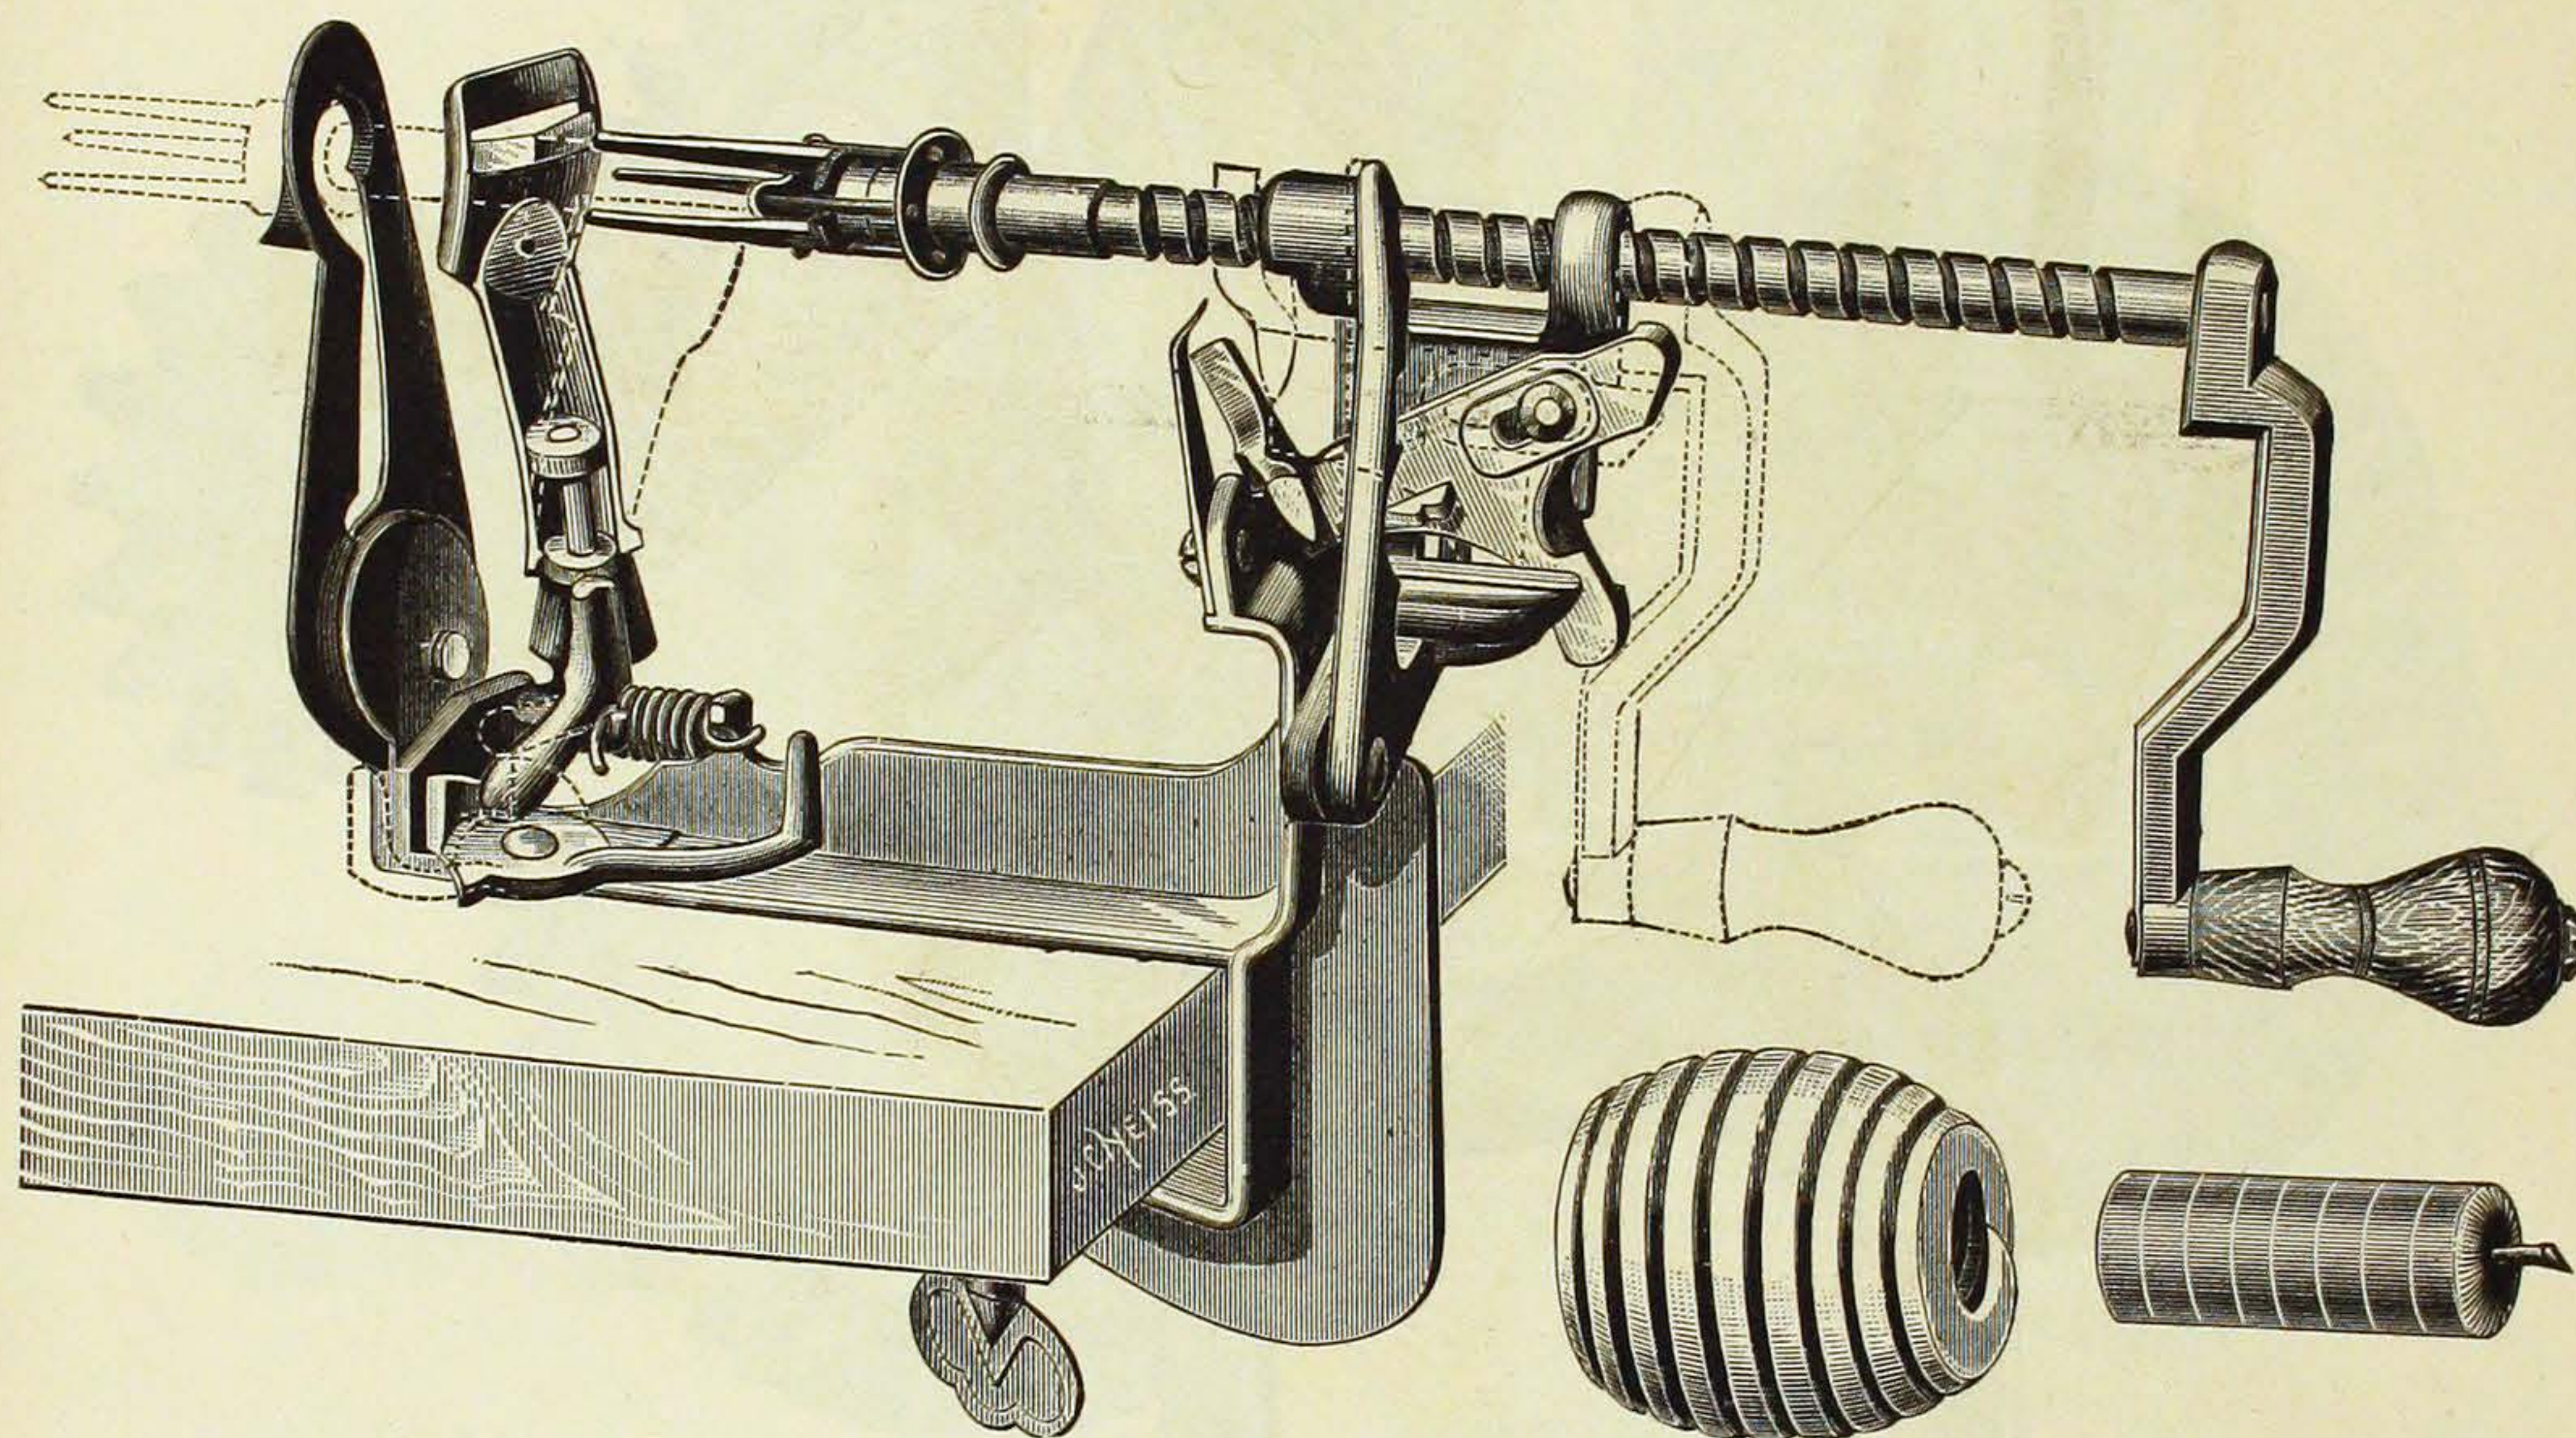

per dozen, \$

Apple Parer, Corer, and Slicer.

3

ADVANCE.

Patented October 19, 1875, January 16 and July 17, 1883, and Patents Pending.

THE ONLY MACHINE EVER INVENTED THAT WILL ENTIRELY PARE, CORE,
AND SLICE AN APPLE.

With one hand you can pare, core, and slice an apple, and withdraw the fork from the core.

By loosening the machine screw you can drop the coring and slicing knife down to the side, and PARE ONLY. The parings are only half the thickness of those made by other paring machines.

Advance Apple Parer, with Patent Core Push-off, per dozen, \$

One Dozen in a Case. No charge for Case.

'76 Apple Parer.

Patented March 5, 1872, October 19, 1875, February 22 and November 14, 1876.

'76
READING
APPLEPARER
 PATENTED
 MADE ONLY BY THE
READING HARDWARE CO.
 READING, PA.,
 U.S.A.

This Parer combines all the latest improvements, is of durable construction and complete operation. Superior in every respect. Can be recommended as one that will give entire satisfaction. This machine is so constructed that it can be used with or without the clamp.

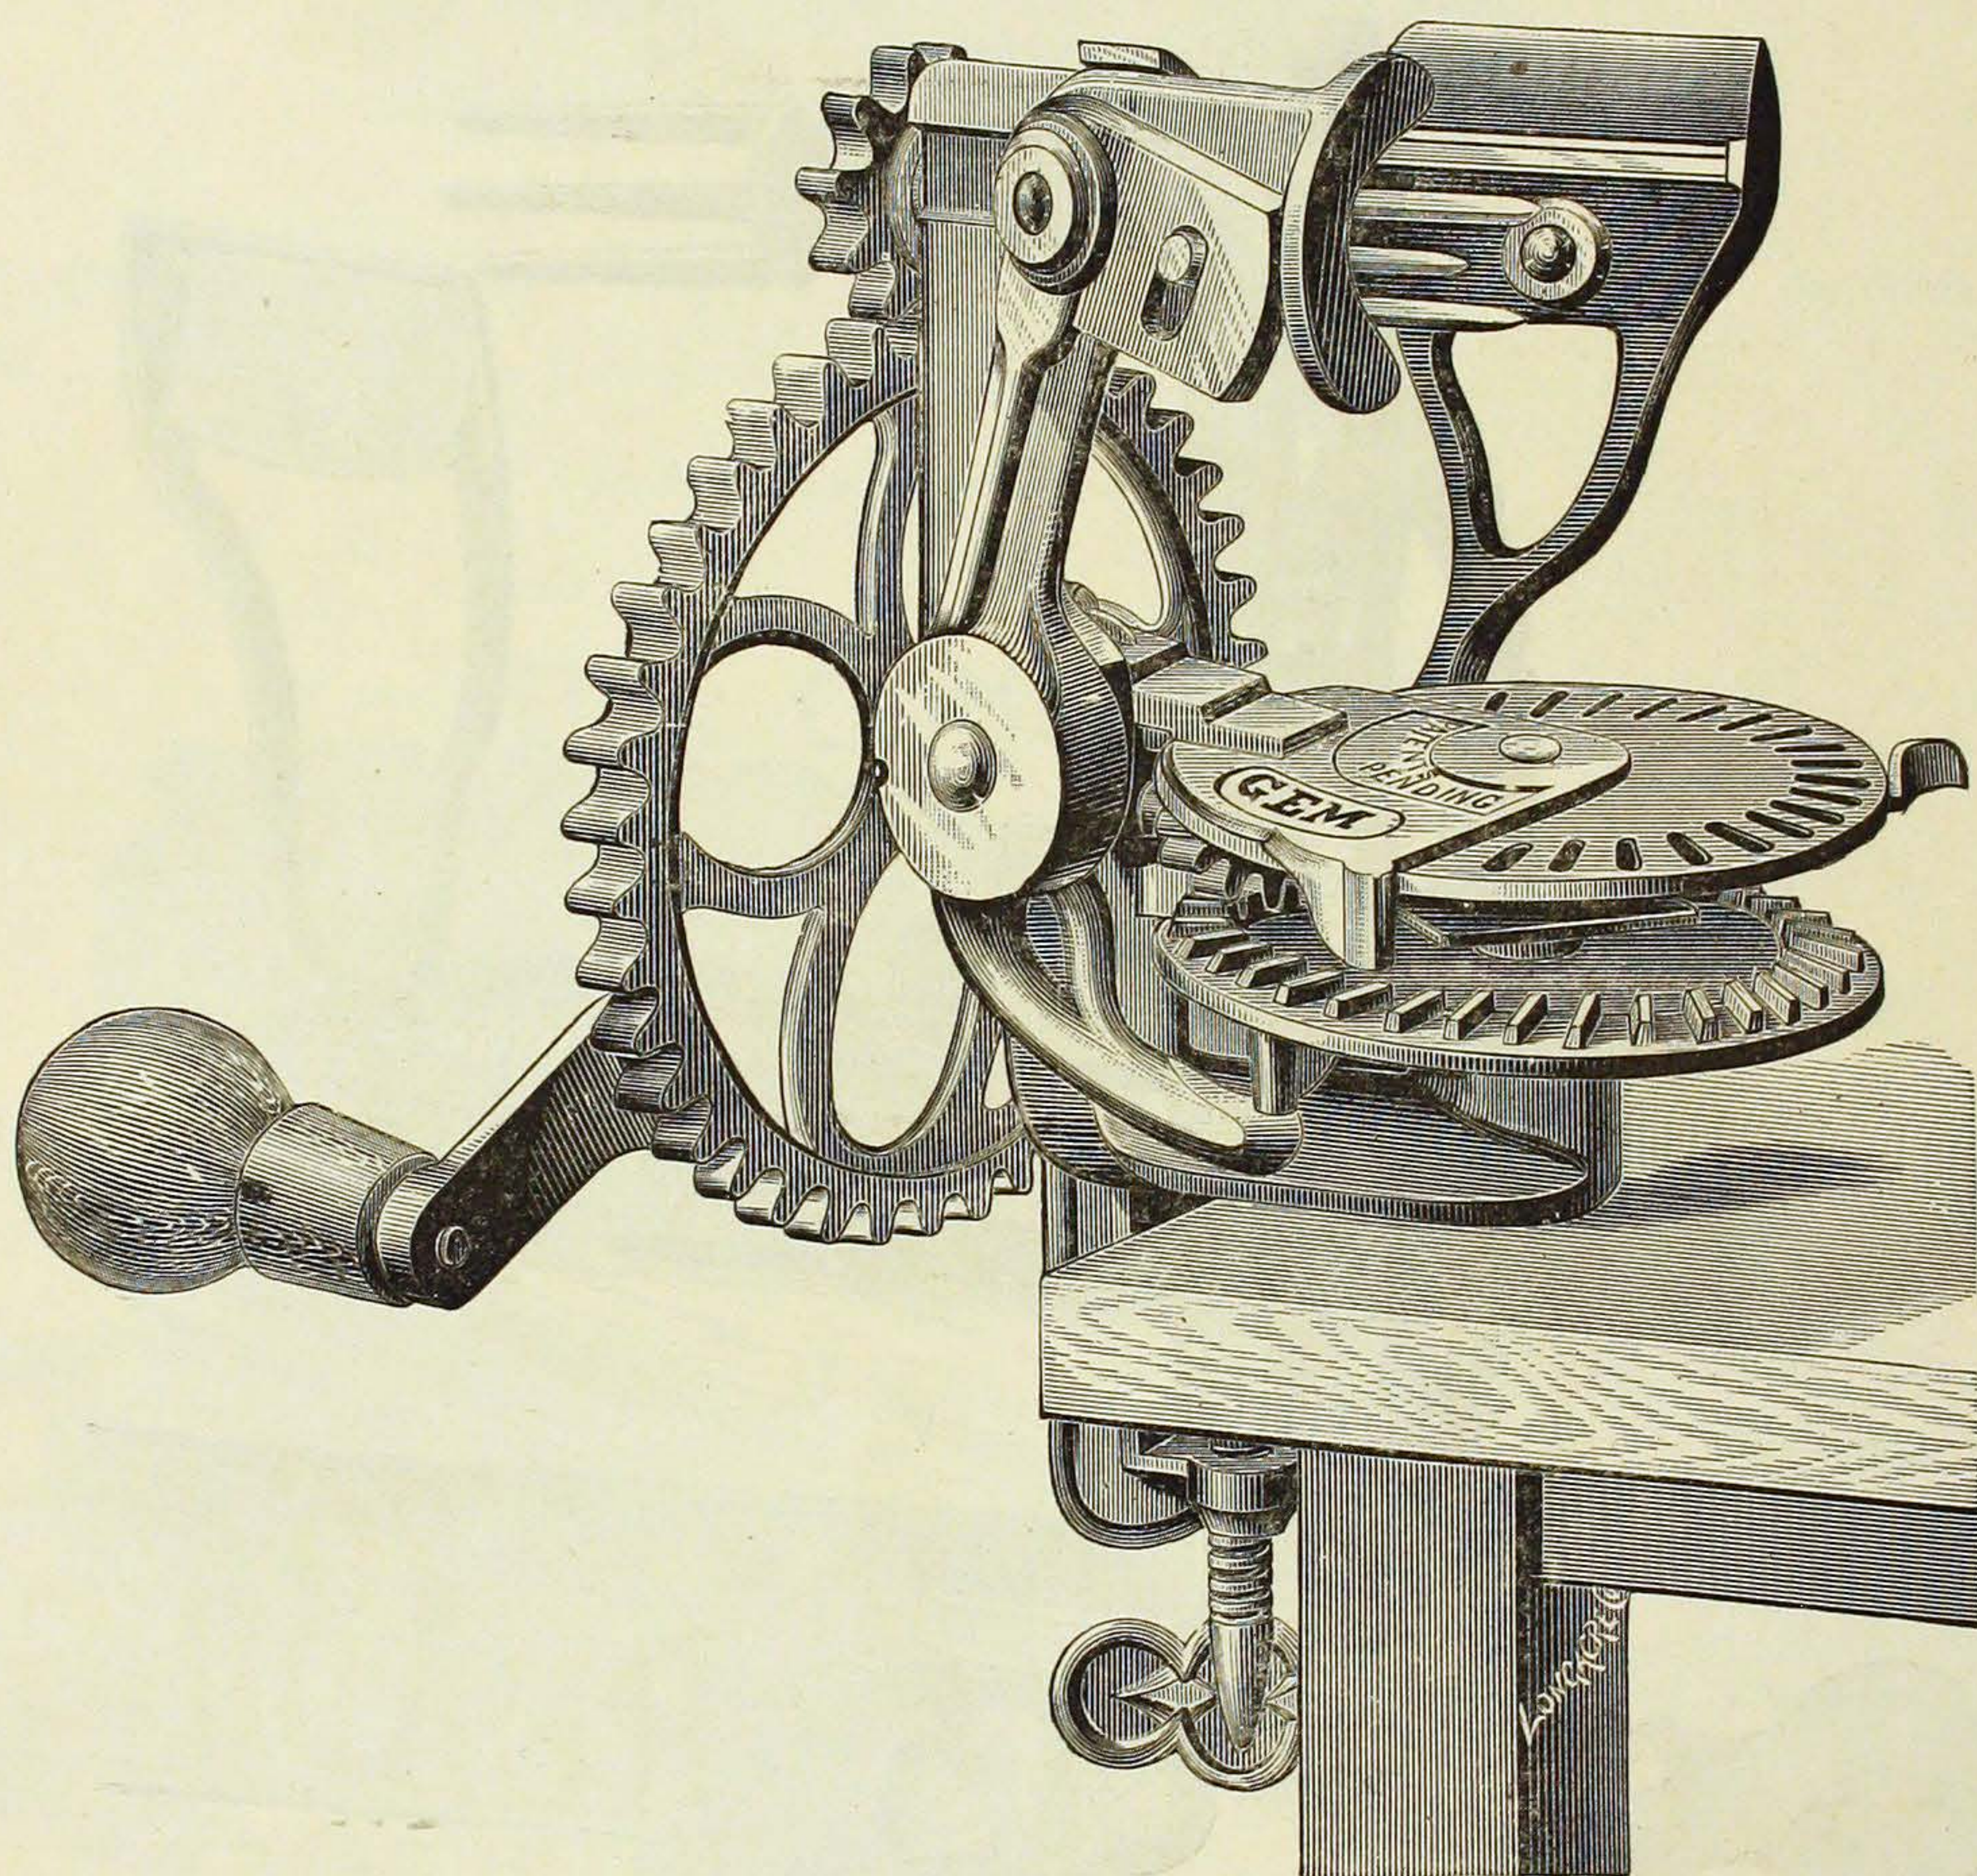

'76 Apple Parer, with Automatic Push-off,

One-twelfth Dozen in a Box. One Dozen in a Case. No charge for Case.

per dozen, \$

Gem Apple Parer.

Patented November 14, 1876, and October 5, 1880.

WITH AUTOMATIC PUSH-OFF.

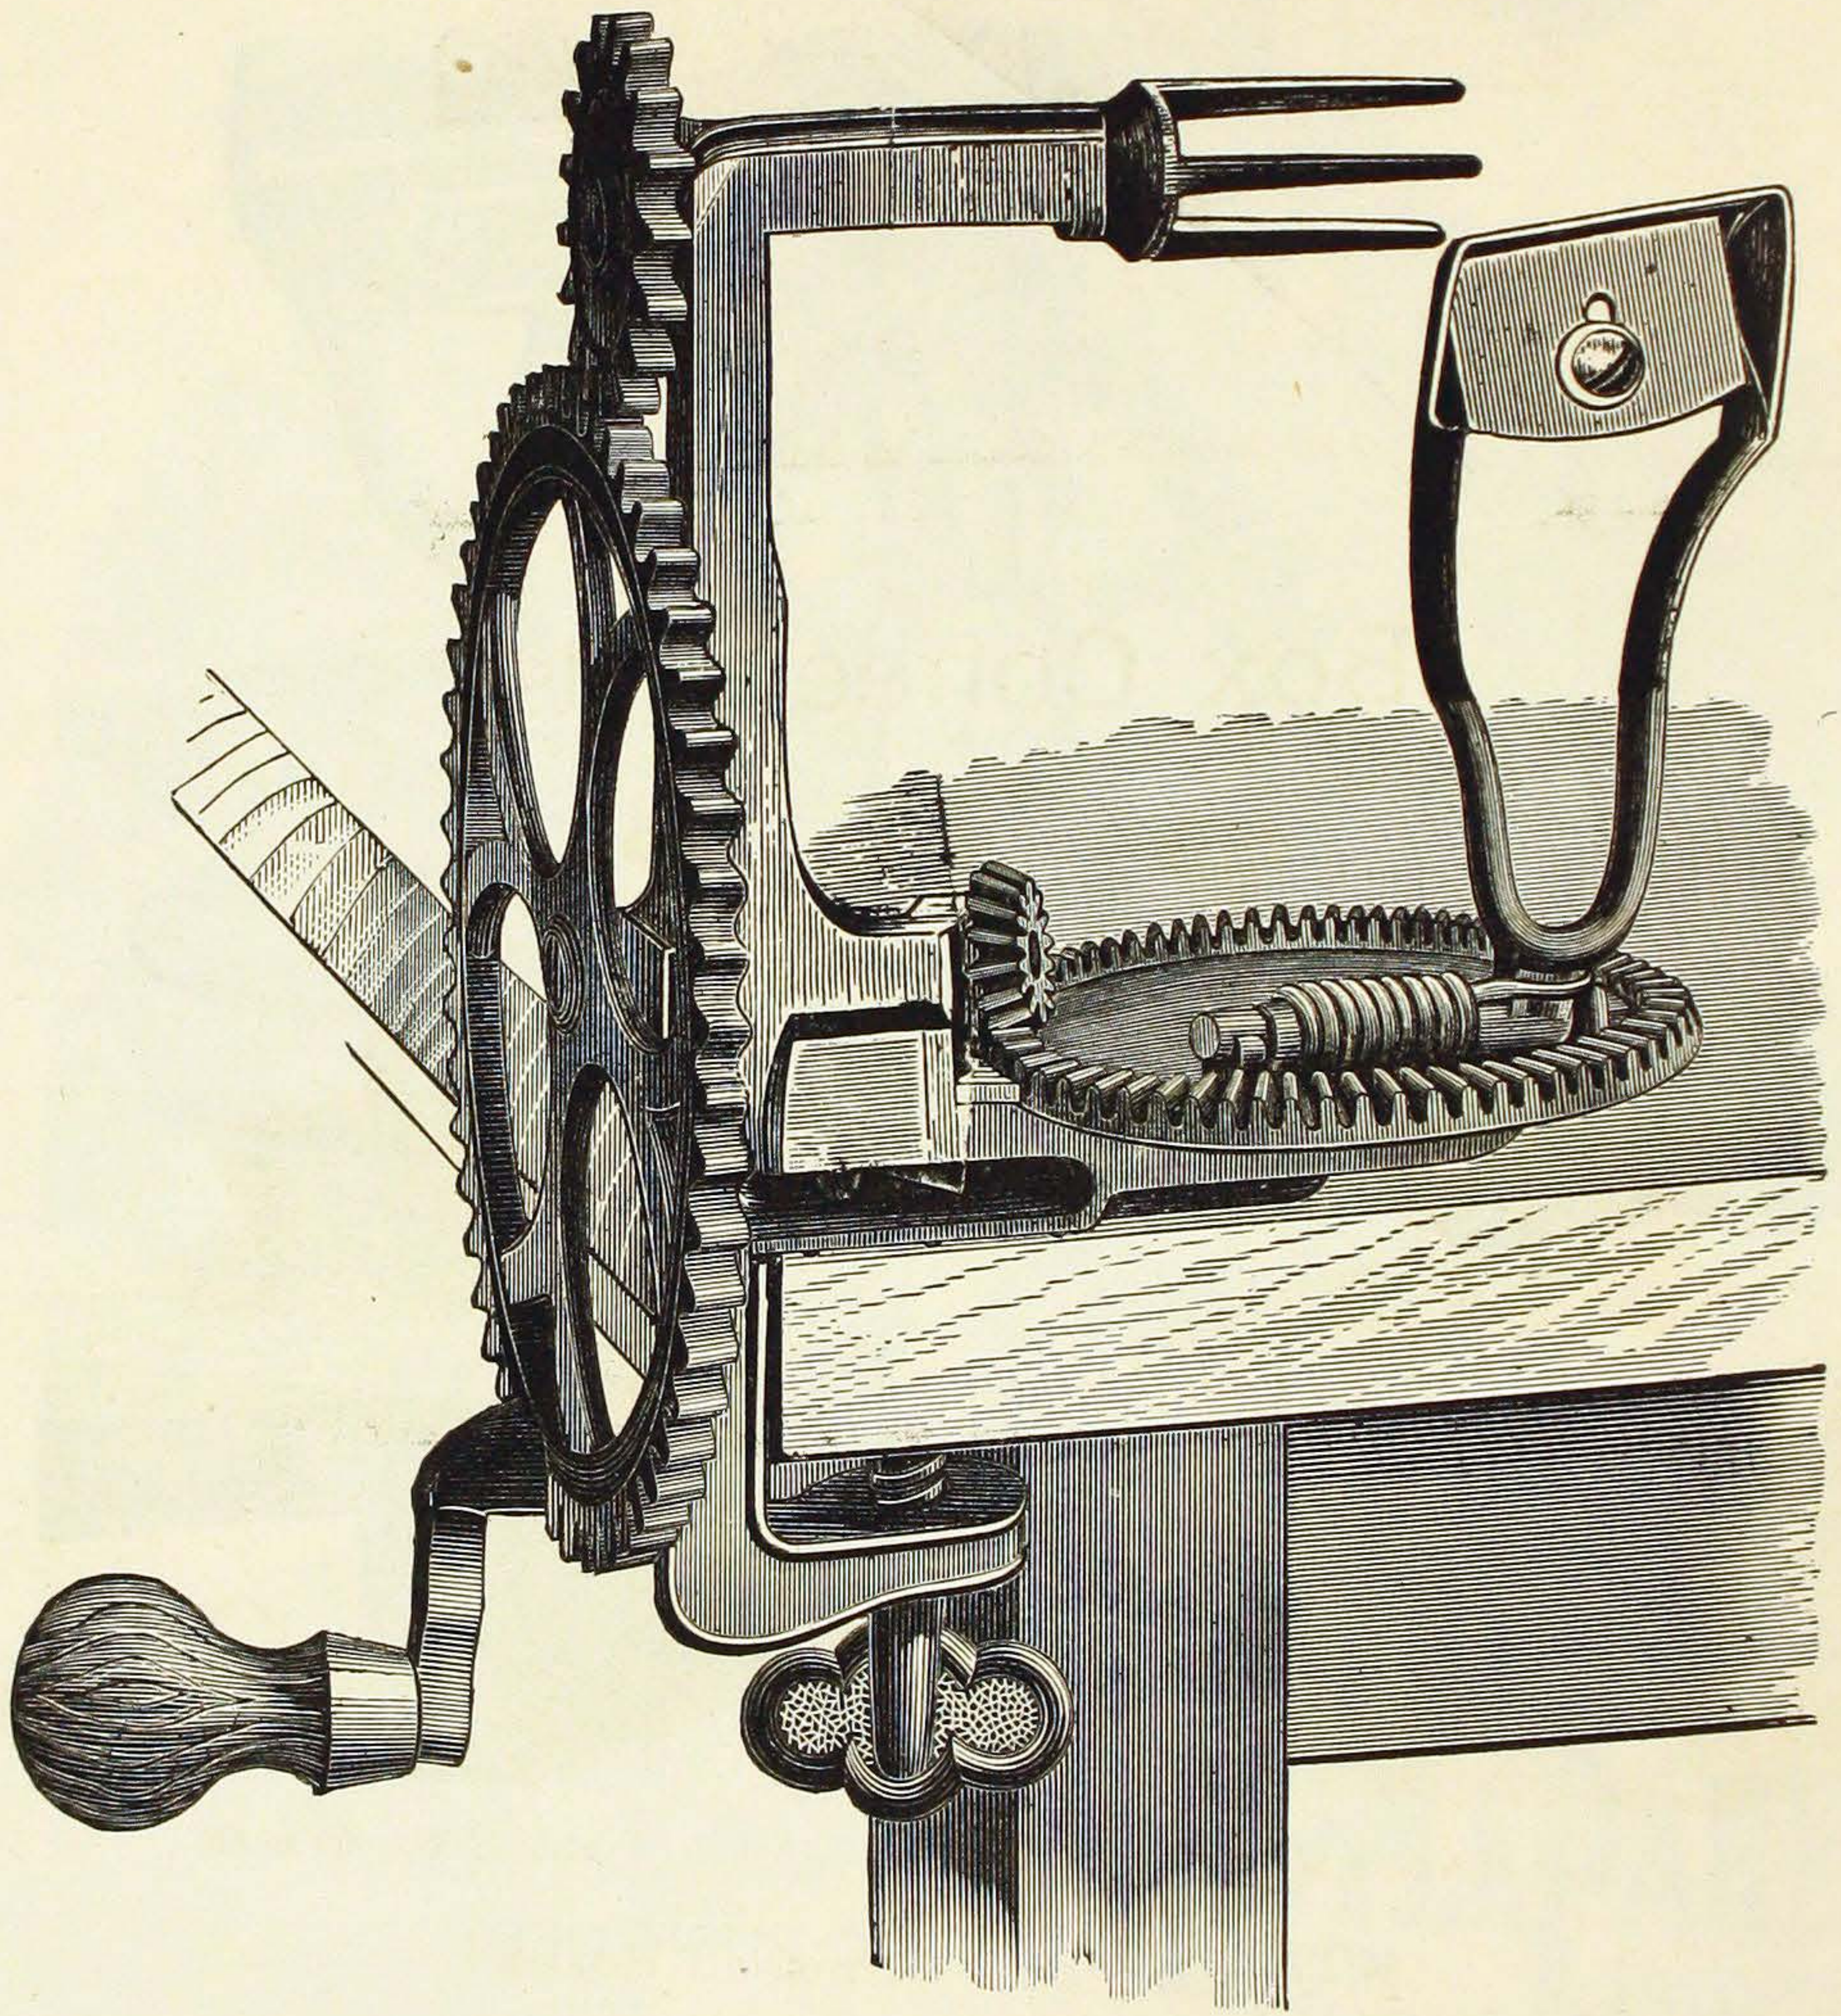

The Gem Parer—neat, light, of rapid movement, and calculated to supply the wants of the trade—requiring a somewhat cheaper though none the less effective machine.

Gem Apple Parer, per dozen, \$

One-twelfth Dozen in a Box. One Dozen in a Case. No charge for Case.

'72 Apple Parer.

WITHOUT PUSH-OFF.

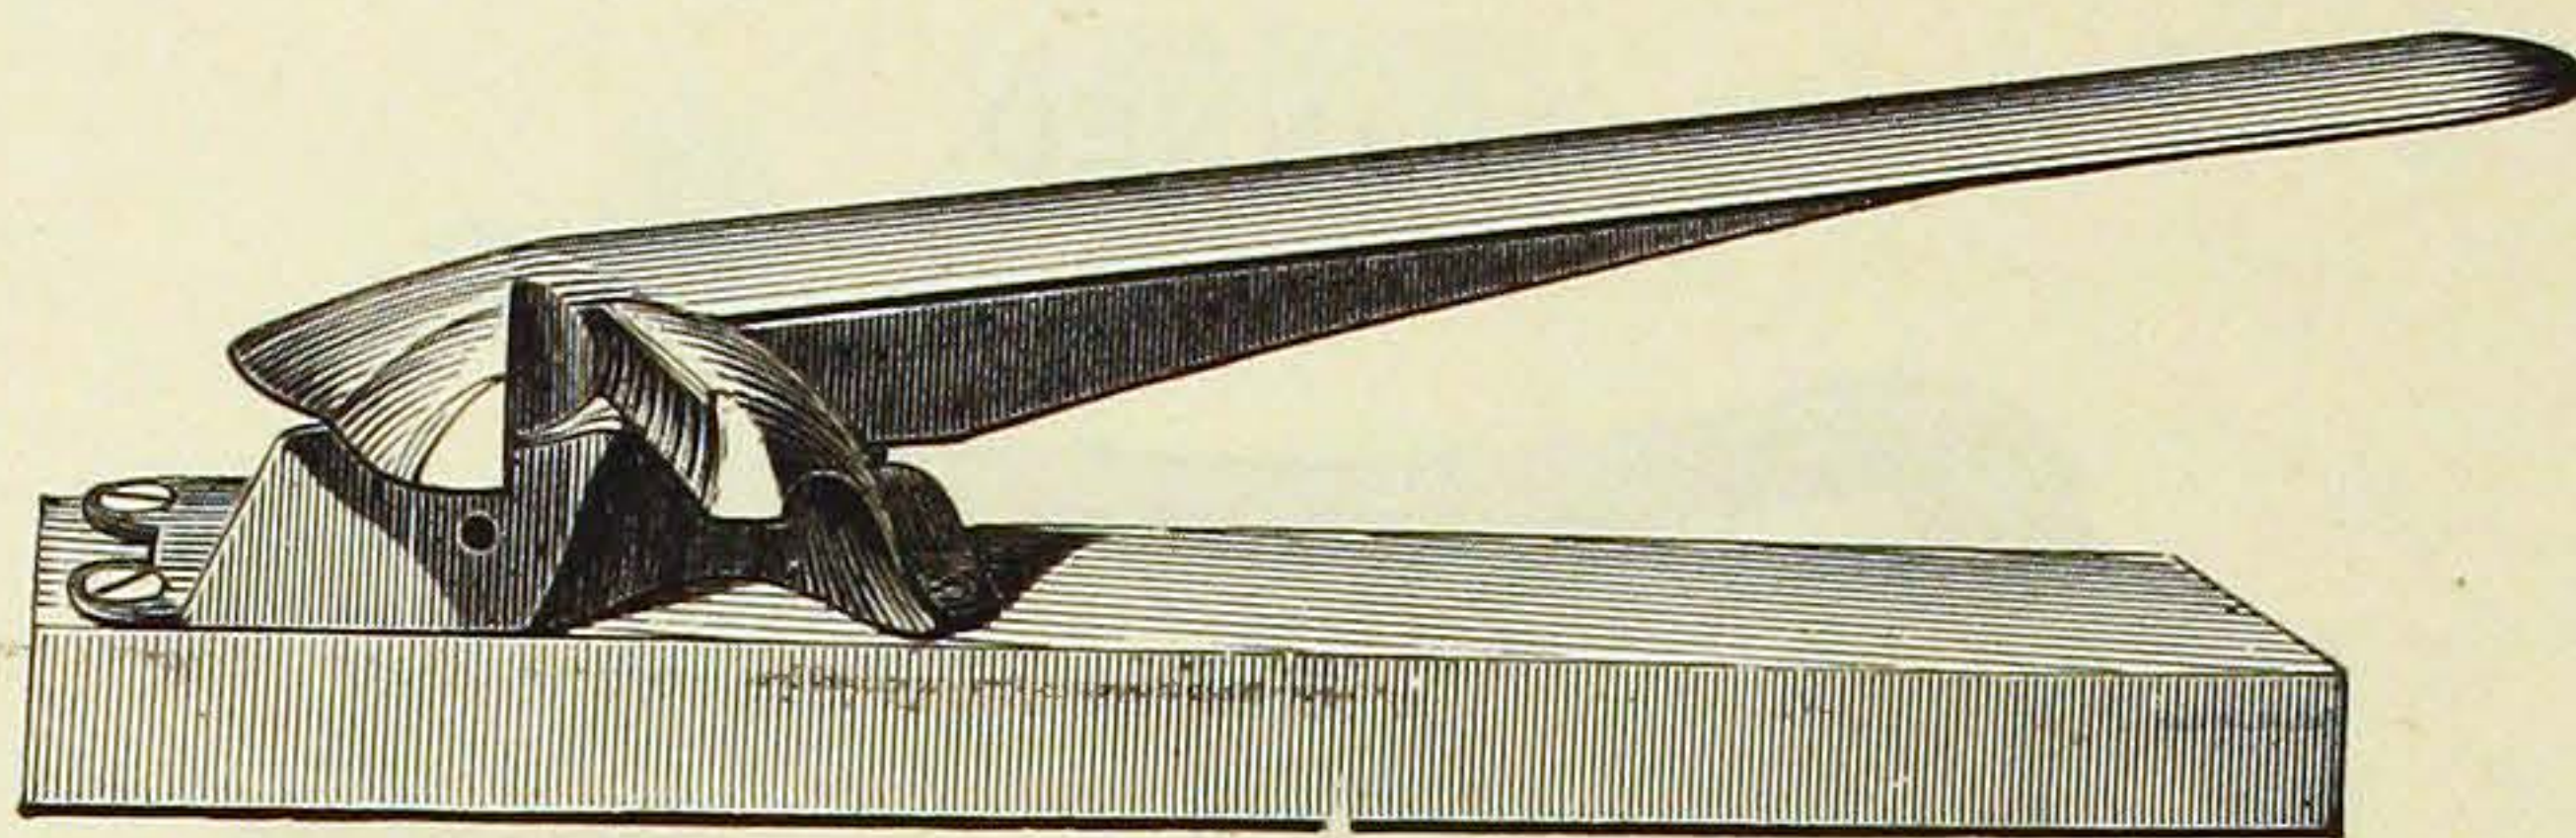

This Parer has been many years in use and given satisfaction, is made without push-off, and performs its work in a thorough manner.

'72 Apple Parer,

per dozen, \$

One Dozen in a Case. No charge for Case.

Nut Cracks.

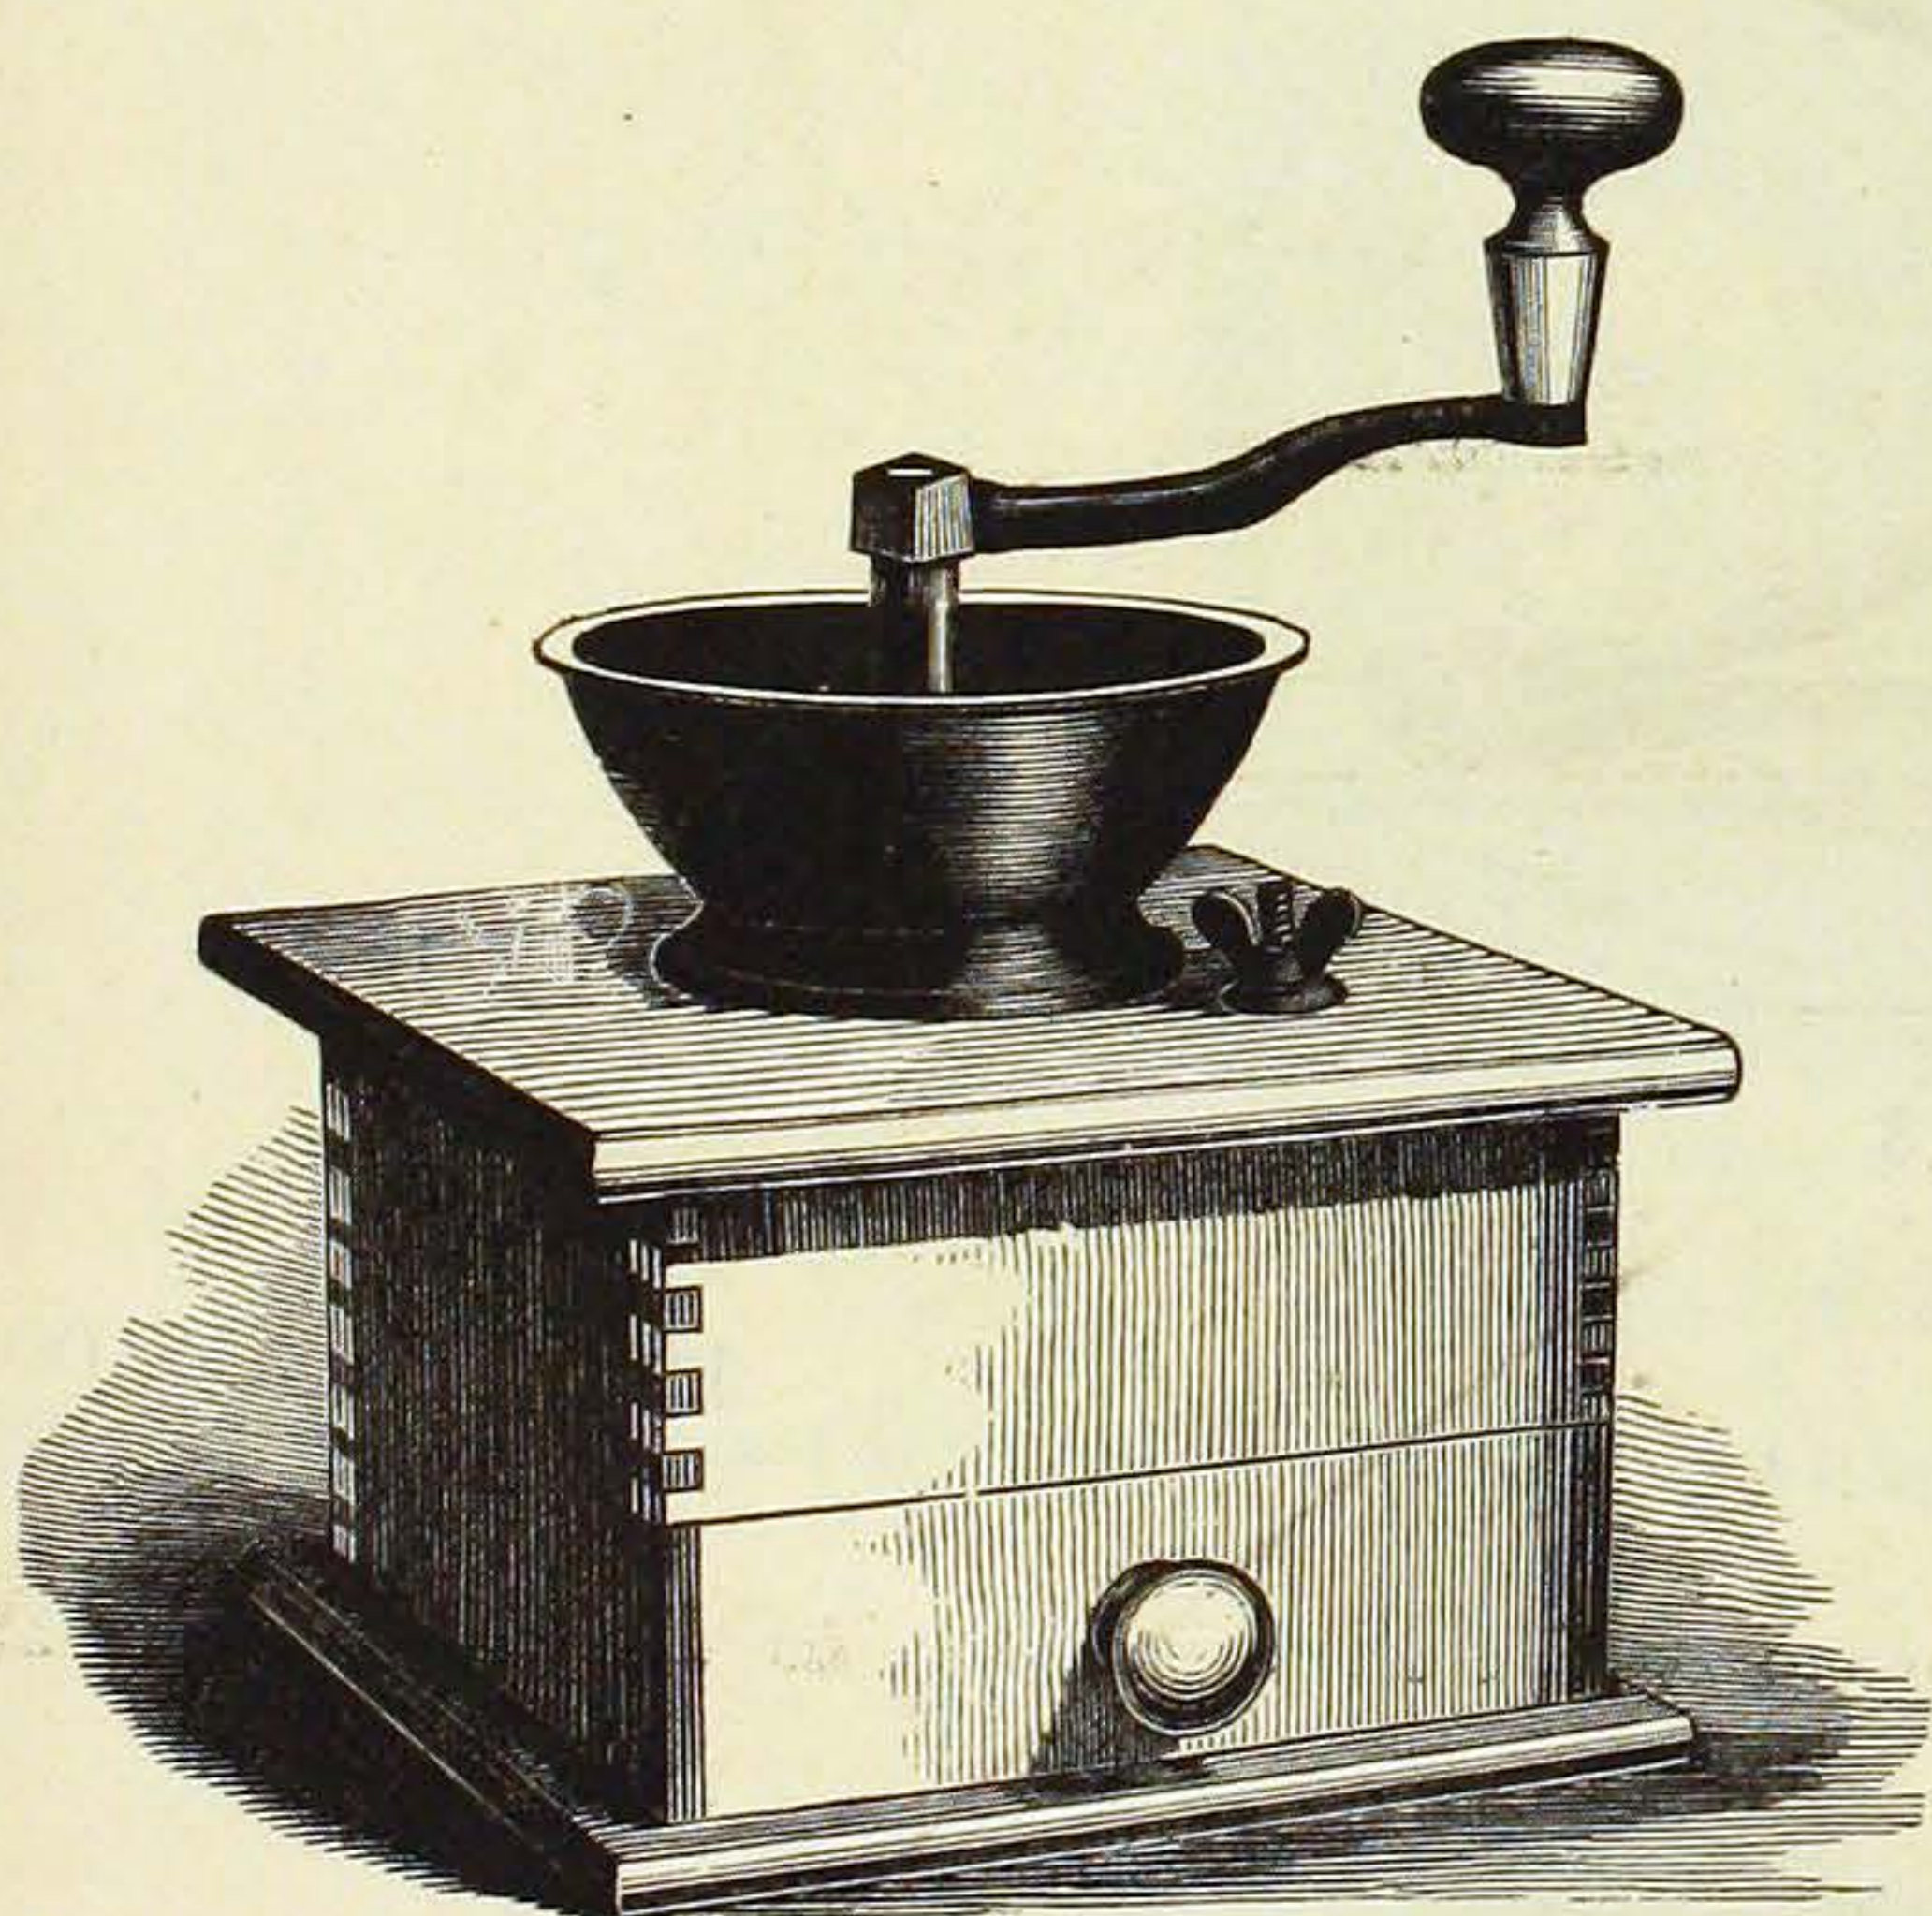

Style of Nos. 10 and 20.

per dozen, \$14 50

One-half Dozen in a Case. No charge for Case.

No. 4, Iron Frame, Bronzed Image, Cast Steel Knife,		per dozen, \$13 50
---	-----------	--------------------

A detailed black and white illustration of a mechanical device, likely a press or stamp. The device has a sturdy, U-shaped frame. A long, curved handle is attached to the top of the frame, extending to the right. The handle has a textured grip. In the center of the frame, there is a circular component, possibly a die or a punch, mounted on a vertical rod. The base of the device is a wide, flat platform. On the right side of the base, the words "LITTLE GIANT" are inscribed in a stylized, arched font. On the left side of the base, the words "1 INCH" are inscribed, indicating the size of the device. The entire illustration is set against a plain, light background.

Style of No. 8. Patented.

Striped with Red and Bronze.

No. 8, Iron Frame, Cast Steel Knife, for $3\frac{1}{4}$ inch Plug, per dozen, \$20 00

An illustration of a 'Standard Cutter' by the Reading Hardware Company. The device features a large, ornate handle with decorative patterns, a central cutting mechanism with a circular blade, and a base with the text 'STANDARD CUTTER'. The brand name 'READING HARDWARE COMPANY' is inscribed on the upper part of the frame.

Style of Nos. 10 and 12. Patented.

Patented November 28, 1882.

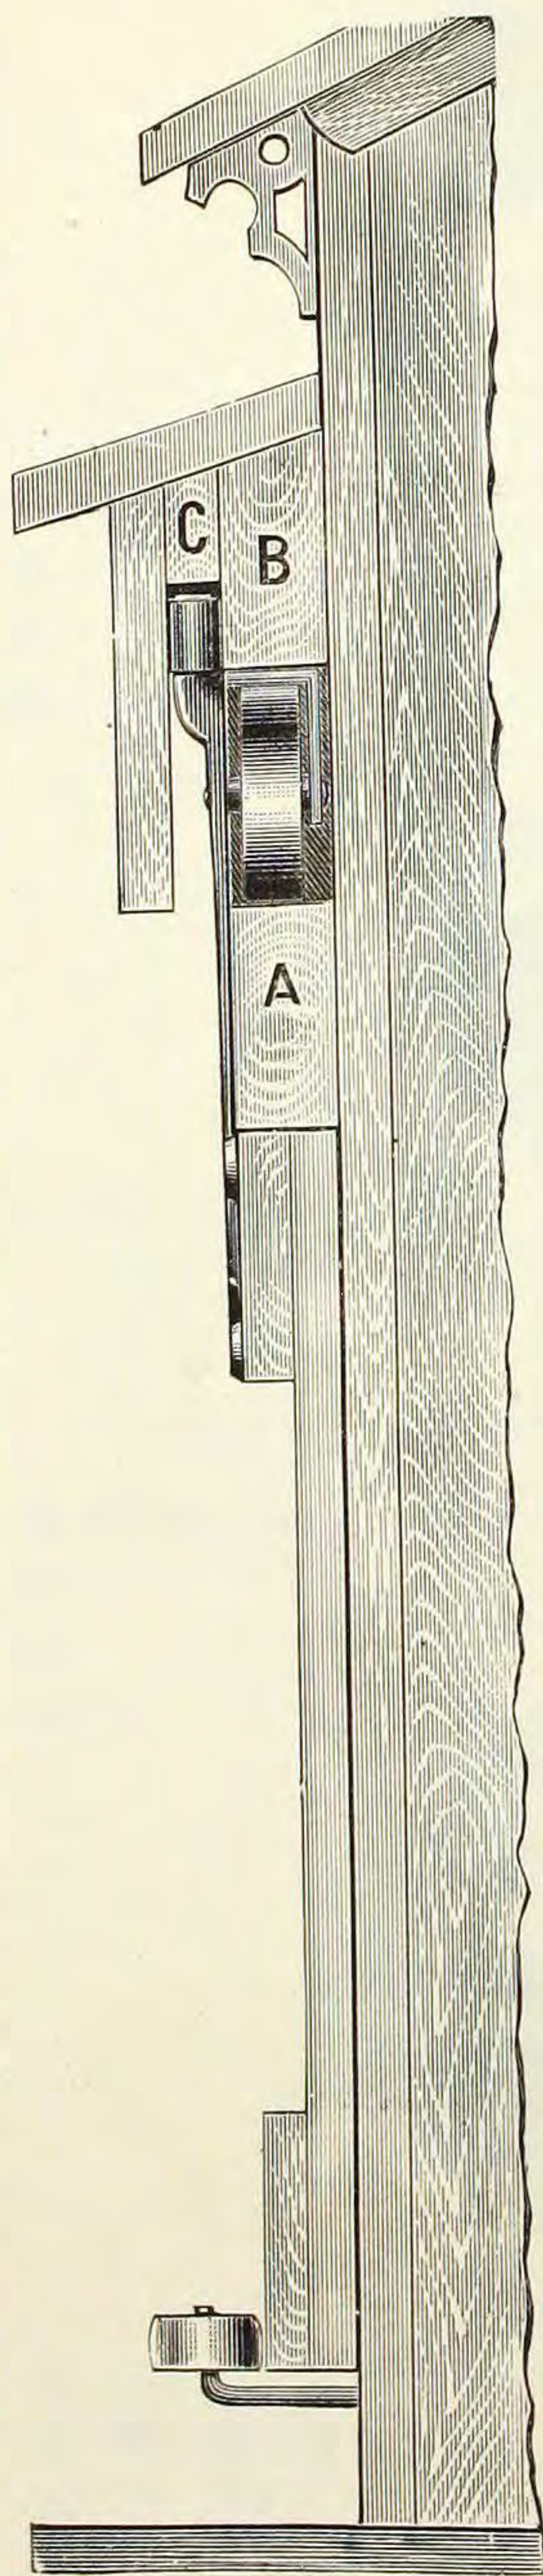

Fig. 1.

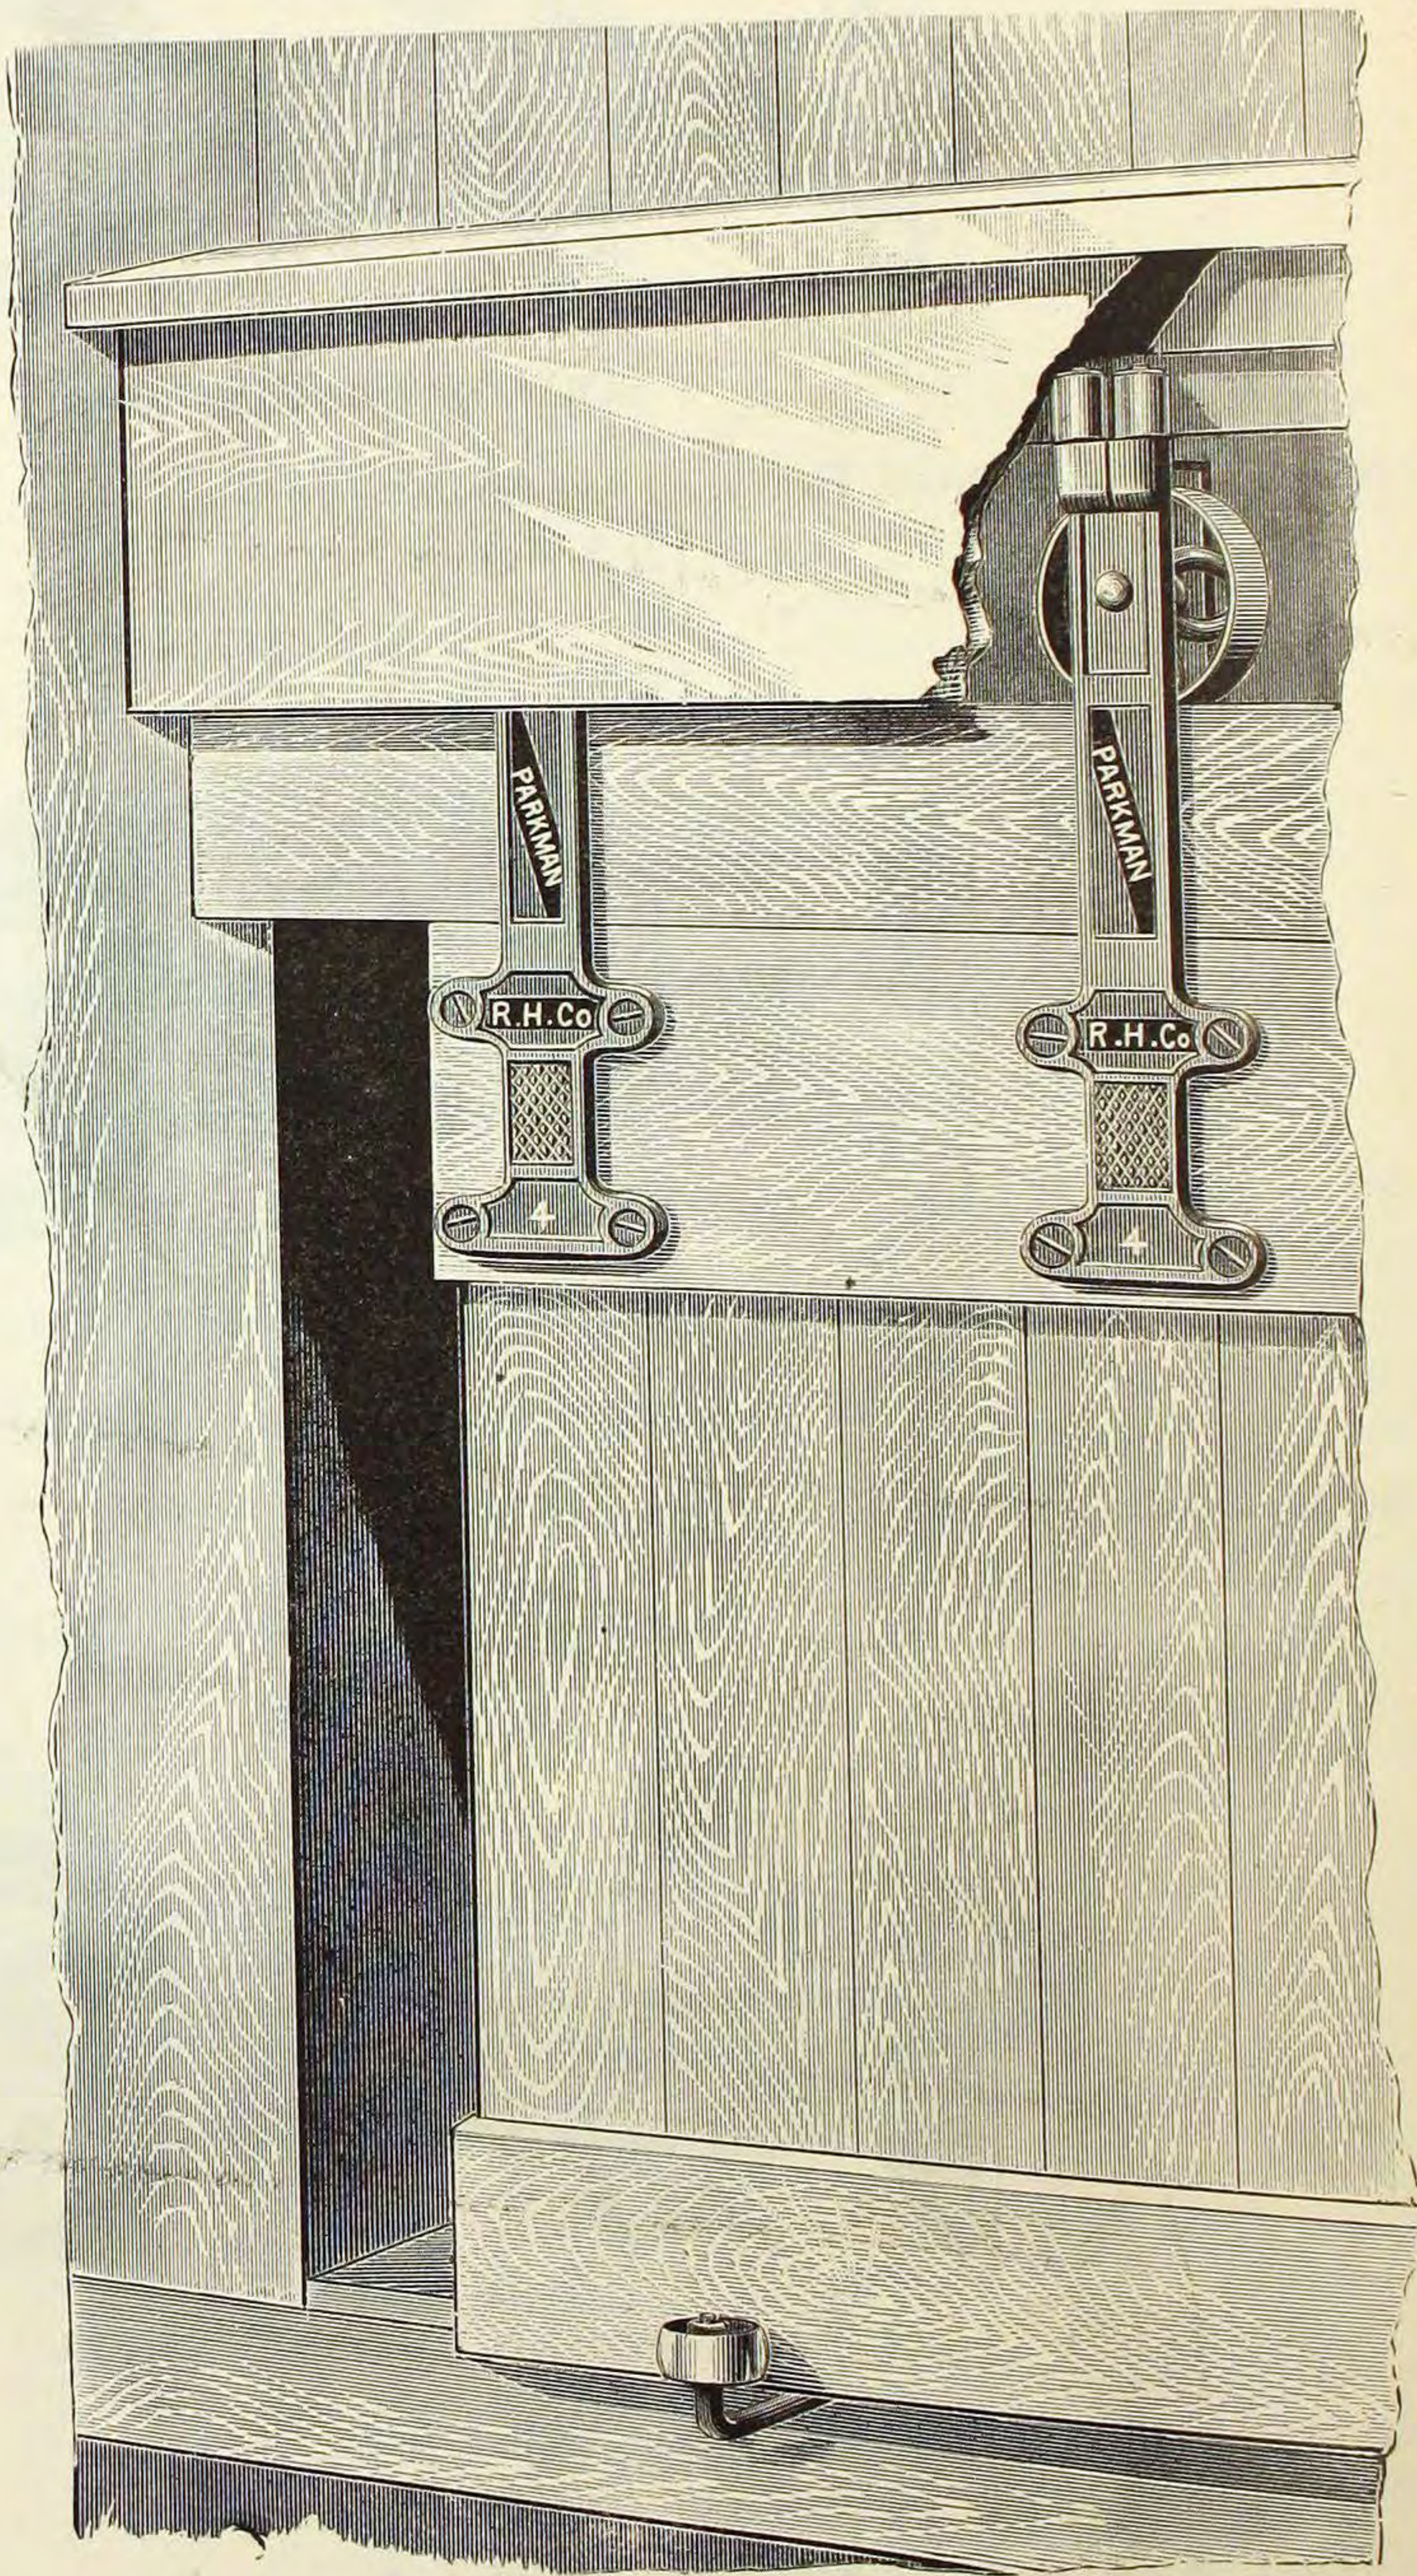

Fig. 2.

For Description see page 203.

Barn Door Hangers.

PARKMAN'S. FOR WOOD TRACK.

Patented.

DOES NOT REQUIRE ANY SPECIAL RAIL TO BE MADE EXCLUSIVELY FOR IT.

(See Cut page 202.)

No. 84, 4 inch, Japanned, 15½ inch Strap,	per pair, \$1 00
85, 5 " " 18 " "	" 1 30

Twelve Pairs in a Case. No charge for Case.

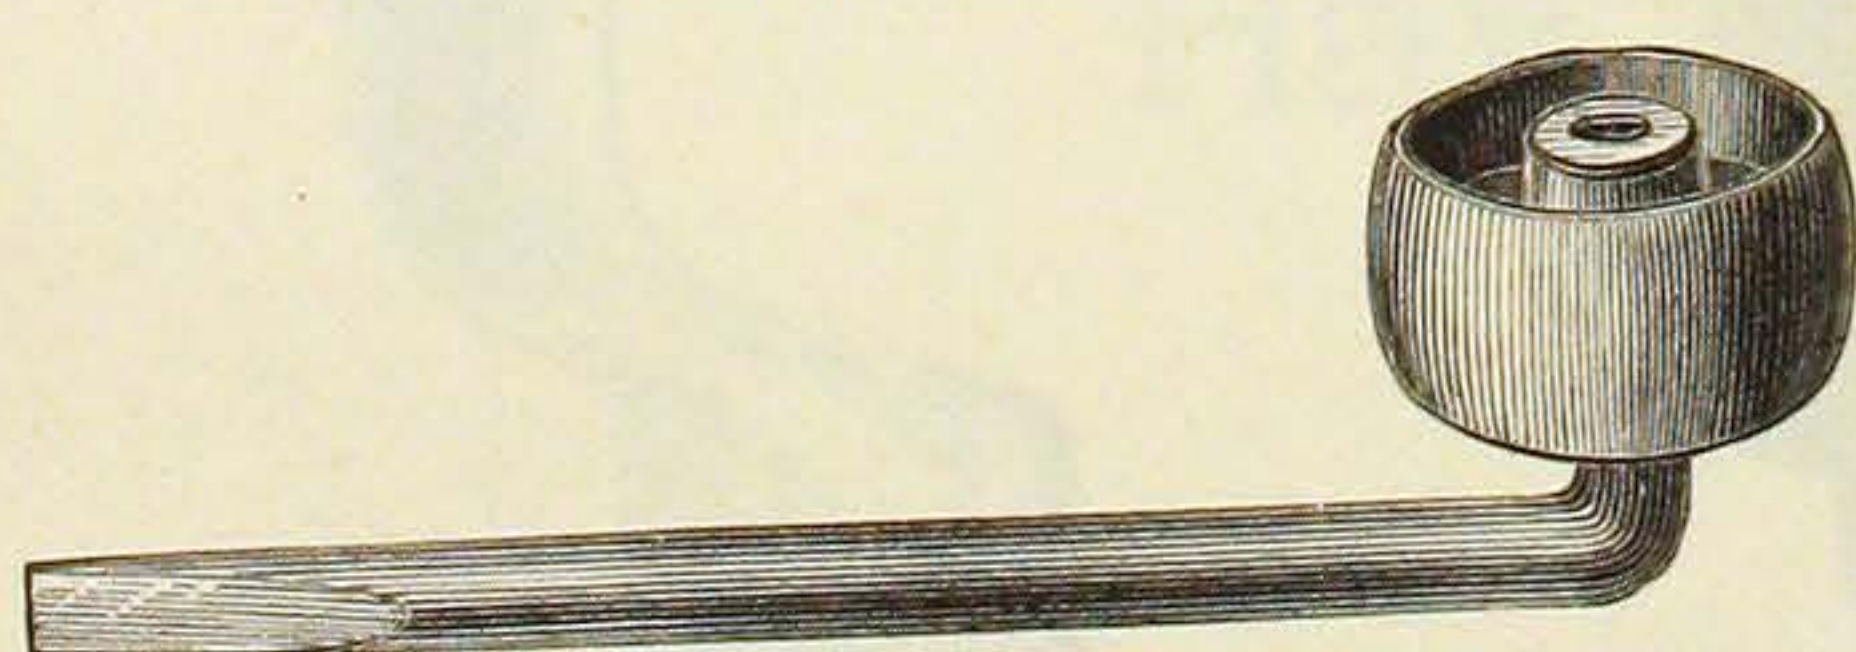

Fig. 1 shows an end view of the hanger. The two small vertical rollers at top of hanger keep the wheel in position on wood track A, and prevent friction of the strap of hanger with wood track.

Fig. 2 shows front view of hanger, with cornice to protect the track and working parts from exposure to the weather; also prevents hay and straw from collecting thereon.

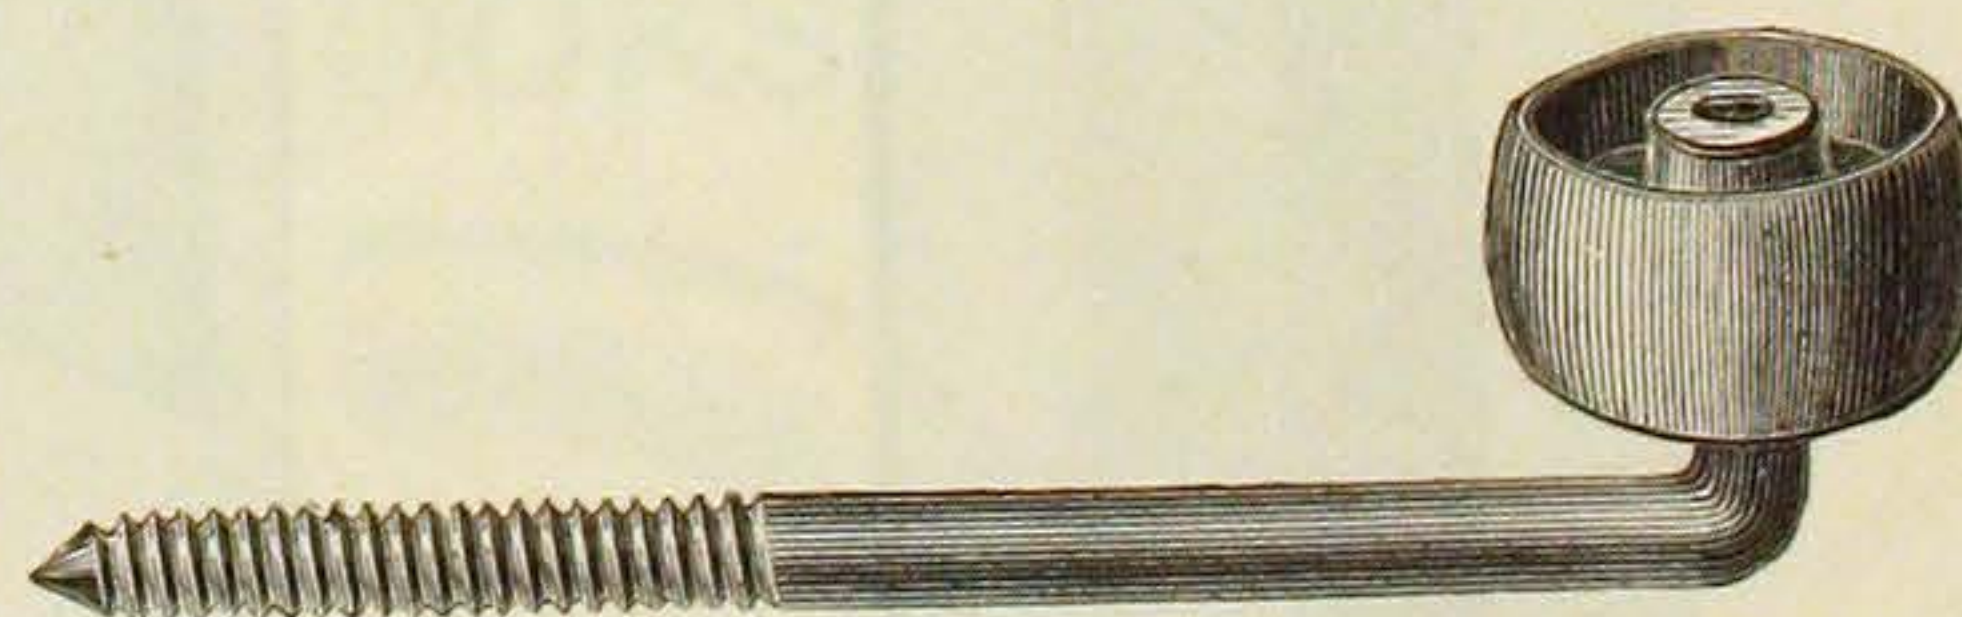

Use for track A, 2×4 inch rail. For B, 2 inches thick. For C, 1 inch thick.

BARN DOOR STAYS ARE RECOMMENDED.

CONSTRUCTING AIR-PASSAGE

Between Lower and Upper Rooms.

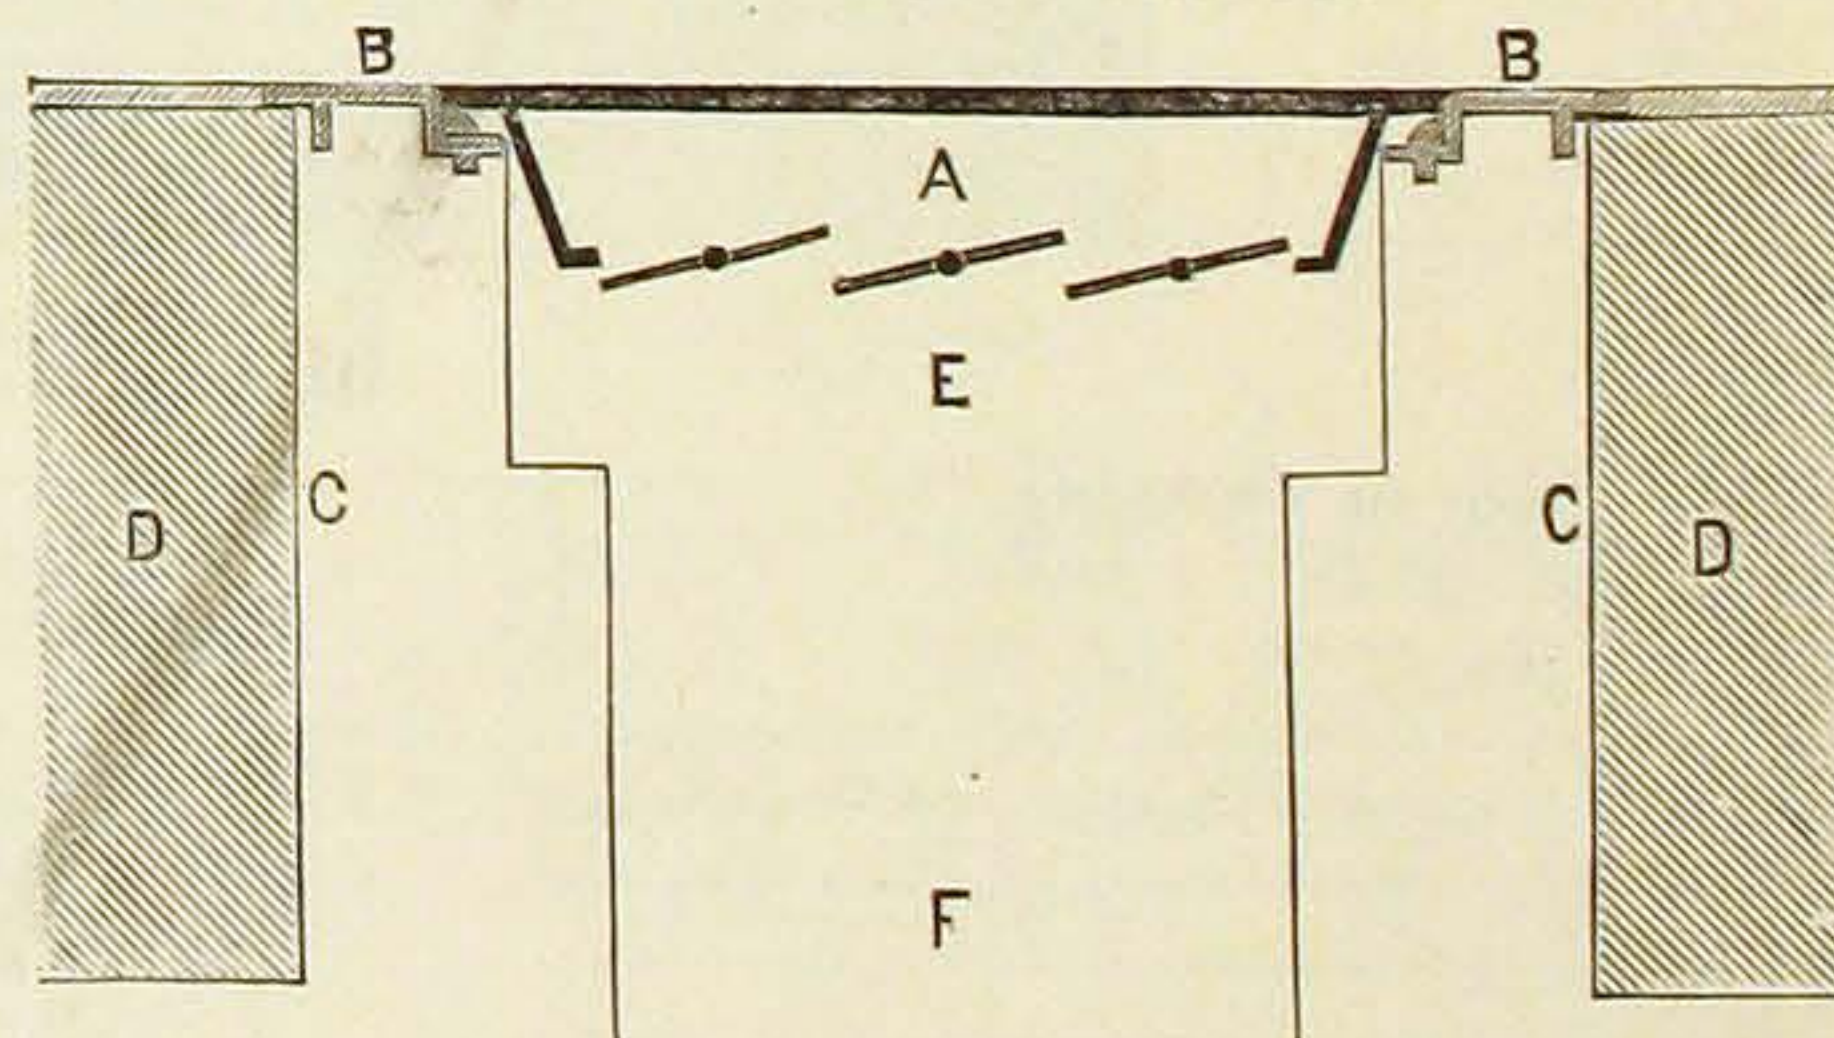

A—Floor; *B*—Ceiling below; *C*—Register in Floor; *D*—Register *Face* on ceiling below; *E*—Tin or Wood connecting the two.

In this way an upper room can be warmed by surplus air from the room under it, and the supply be regulated by the Register above. Or, if it be more convenient, a Register to be operated by cords may be placed below and a Register Face on the floor above.

Any of the various sizes of Floor Registers will answer the purpose.

SETTING FLOOR REGISTERS

In Border Frame.

A—The Register; *B*—The Border Frame; *D*—Thickness of Floor and Timbers; *F*—Tin Hot-Air Pipe; *E*—Tin Register Box; *C*—A complete Lining of Tin for the Opening.

By this arrangement a space is left around the Hot-Air Pipe and Register, allowing a circulation of air on both sides of the Border Frame.

DIMENSIONS OF Registers and Ventilators,

Showing space occupied, opening required, and data from which measures for Tin Boxes may be taken.

Tin Boxes should be a trifle larger than measures here given; and, according to size, from one to three inches deeper than those given for Registers when open.

ROUND. Nos. 100 to 170.
